

## Erasmus+ Exchange Program on Faculty of Organisation Studies in Novo mesto (From January 2019 till April 2019)

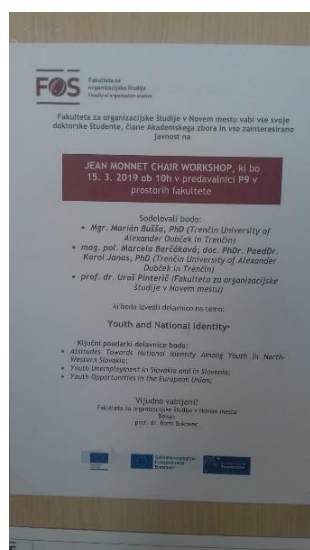

Marcela Barčáková from University of Alexander Dubček in Trenčín, Slovakia

ERASMUS+ is a great opportunity to travel to places where you would otherwise have a big difficulty, such as foreign universities or faculties. That was my main reason for applying for the ERASMUS+ traineeship. I chose Slovenia because it is a beautiful country with quality universities, and it is often mistaken with Slovakia because of similar names 😊

Picture: Novo mesto

I am a PhD candidate at the Trenčín University of A. Dubček in Trenčín, Slovakia. Traineeship in Novo Mesto was a great experience for me. Modern spaces, great and very helpful FOŠ team members, foreign lecturers and much more. I chose FOS for her high-quality professors (I want to really thank Professor Pinterič for his willingness and effort in my leadership during the traineeship) and the opportunity to meet them and see how they work with students, or how they work in the scientific field. I have to say, that all students I had the opportunity to meet they were really satisfied with professor's approach to learning.

During my traineeship I had opportunity to be part of the international workshop. Also I had the opportunity to be part of preparation team. This was great opportunity for me because during preparation of this workshop I gained new life changing experiences which will for sure help me in my life and in my career.

I am really grateful for this opportunity and I really recommend this to all students and also teachers.

I truly believe that those few months I spent in beautiful Novo Mesto were not the last. I want to come again, because Faculty, town and people, they left a beautiful trail in me. I want to thank again to FOŠ team and ERASMUS+.
