

ITU TELECOM WORLD 2014 Young Innovators Competition

ITU, the leading United Nations agency for information and communication technologies (ICTs), in partnership with the IEEE IoT Initiative is looking for the best ideas for new businesses and innovations that can take advantage of the potential of the Internet of Things (IoT) to be used for social good and thus improve lives of people all over the world.

This may involve methods for spreading or expanding access to existing technology such as near field communication, sensors, RFID or QR codes in emerging or developing countries. It might involve the application of IoT technology to issues and fields of particular interest to emerging or developing economies, such as agriculture, water management, transportation, or predicting disease outbreaks.

Are you an entrepreneur under the age of 30 and interested **in winning up to USD 5 000** in funding, plus mentorship, networking, and high-level exposure before an influential global audience of decision-makers? Are you interested in working on concepts and ideas for new social start-ups through a process of **co-creation**?

Do you want to be part of the select group of young innovators from all over the world present **at ITU Telecom World 2014** in Doha, Qatar?

Apply now at: <https://ideas.itu.int>

Deadline: Monday, November 03 2014
